# LFOG

## Dry Fogger

### Performance Features

- Produces Dry Fog that is as light as air Micro Droplets (0.1 to 5 microns)
- Input: 110V Single Phase
- Maintenance Free
- Compact (W19.6" x H13.9" x L24.8")
- Weight: 72 lbs.
- Robust Construction
- Quiet Operation (70 DBA @ 5 Feet)
- Automatic Shutoff (0 to 6 Hours OR continuous)
- Wheels & Handle for easy Transportation
- No manual labor to fog the room
- No residue or moisture left behind

### Perfect 3D hygiene for rooms

The LFOG is a device for airborne room disinfection by an automated process.

Compressed by a compressor and forced through a fine nozzle, A disinfectant solution is sprayed into the air so finely that the finest mist is created. This mist reaches all surfaces in a treated room without gaps and ensures perfect 3D hygiene.

Most Foggers & Misters on the market today put out a droplet size - between 10 and 70microns. This size of droplet when rendered wet is heavier than air so it drops directly onto the nearest surface, leaving the surface wet and a noticeable residue for additional cleaning after works complete

- ▶ Dry, Ultra Fine Mist
- ▶ Robust Construction
- ▶ Quiet Operation
- ▶ Maintenance Free

### Simple, economical, variable and solid

- Easy deployment and operation
- Cost-effective operation with refillable holding tank of active solution
- Developed for use with Sanosil aerosol disinfectant or HOCL approved disinfectant

• SCHOOLS • FACILITIES • MEDICAL OFFICES • HOSPITALS • SANITIZATION STATION • TRANSPORTATION STATIONS • AIRPORTS

AVAILABLE FOR SALE, RENTAL, OR RENTAL PURCHASE
